

Virtual Arts & Crafts Fair

Announcing a new presentation of Amata's Virtual Craft Village and Craft Fair...

On the 1st of November the Virtual Craft Village, set up recently by association Amata, has undergone a noticeable face-lift. It is now much easier to use and adapts itself automatically to the small screens of mobile phones and tablets.

At the same time, ten new artisans started in their virtual fair, to sell their ceramics, crocheted soft toys, personalised linen bags, hand painted silk, mandalas painted on stones, leather handbags, hand woven shawls and mufflers and silver, leather or

macramé jewellery. There are now three virtual fairs, each one with ten stalls, showing up to 30 different products, as well as a video with more goods or with a craft demonstration.

These virtual fairs are set up in the centre of the virtual village

www.puebloartesano.es, where you can also watch the artisans at work in their workshops, buy their work in their shops and follow various tutorials. In the (Spanish and English) menu, you will see that there is a lot to do and to see, that makes a visit to this, still growing, virtual village worthwhile.

Welcome to Amata's Virtual Craft Village.

All of us who live here, are real artists and artisans, who would like to share our passion for our crafts with you. In our workshops we show you the techniques, tools and materials we use to create our items. With one click on the title of the squares below, you can visit these workshops, go to our shops, walk around our virtual craft fairs or follow classes and tutorials. When you go to the English menu (or the Spanish!) above, you will see that we also have a playground, a news stand, several surprise houses and an information desk, where we explain in more detail what there is to see and do in this village and how everything works.

And, don't forget: we only just started this village, we're still building, making it bigger and better every time!

Visit the workshops

You can visit each and every workshop and watch the videos that show the artisan at his or her work. If you want to know more, you will also find all the details to contact him or her.

Visit the shops

In the shops you can buy handmade products directly from each artisan. Soon you can even add products from several artisans in one cart and pay all at once!

Visit virtual fairs

In our virtual fairs different artisans show part of their work. They also give their contact details, in case you want to order something personalised or specially made.

Craft tutorials

Following the instructions of the artisan you can make your own craft items at home, using some simple techniques. Everything can be done with basic materials and tools.
